Apex Aims To Export Half Of Its Products In 5-10 Years

Apex aims to export half of its products in 5-10 years

APEX Healthcare Bhd is targeting to increase the export of its pharmaceutical products to 50% of its revenue within the next five to 10 years from 25% now.

Its group managing director Dr Kee Kirk Chin said it would be able to do so on the back of its expansion programme, whereby it would invest RM26 million on a new manufacturing facility in Melaka.

"In the near term, we see export growth coming from the (Asean) region. Depending on the demand, we see (revenue from) exports increasing to 50% from 25% now," Kee said.
